

Rabbit anti Amyloid beta Polyclonal Antibody

Alternative Name(s): Amyloid beta

Order Information

Description: Amyloid beta
Catalogue: 500-3534
Lot: See label
Size: 100ug/200ul
Host: Rabbit
Clone: nan

• Application: IHC(P), WB, IP

• Reactivity: Hu

ANTIGEN PREPARATION

A synthetic peptide corrsponding to the N-terminus of human Amyloid beta

BACKGROUND

Amyloid beta peptides are derived from the amyloid precursor protein (APP) which is cleaved by beta and gamma secretases. Some of these peptides are secreted and can bind to the acetyltransferase complex APBB1/TIP60 to promote transcriptional activation, while others form the protein basis of the amyloid plaques found in the brains of patients with Alzheimer disease. The aggregation of the amyloid beta peptide into oligomers or fibrils is now implicated as a key process associated with progression of AD, the most common cause of dementia in senior population. In addition, two of the peptides are antimicrobial peptides, having been shown to have bacteriocidal and antifungal activities. Mutations in this gene have been implicated in autosomal dominant Alzheimer disease and cerebroarterial amyloidosis (cerebral amyloid angiopathy).

PURIFICATION

The Rabbit IgG is purified by Epitope Affinity Purification

FORMULATION

This affinity purified antibody is supplied in sterile Phosphatebuffered saline (pH7.2) containing antibody stabilizer

SPECIFICITY

This antbody recognizes human Amyloid beta . The other species not tested.

STORAGE

The antibodies are stable for 24 months from date of receipt when stored at -20oC to -70oC. The antibodies can be stored at 2oC-8oC for three month without detectable loss of activity. Avoid repeated freezing-thawing cycles.

APPLICATIONS/SUGGESTED WORKING DILUTIONS*

• Western Blot: 0.1-1 µg/ml

• ELISA: 0.01-0.1 μg/ml

• Immunoprecipitation: 2-5 µg/ml

• IHC: 2-10 µg/ml

· Flow cytometry: Not tested

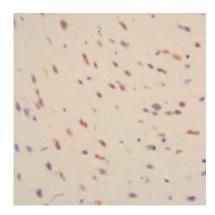

• Molecular Weight: 4.0

• Positive Control: Kidney Tissue

• Cellular Location: Cell Membrane

^{*}Optimal dilutions should be determined by researchers for the specific applications.

Immunohistochemistry: Human Brain (AD) (FFPE) stained with Rabbit anti-Amyloid-beta (Cat# 3534) at 1:200 for 10 min @ RT. Staining of formalin-fixed tissue requires boiling tissue sections in 10 mM Citrate Buffer, pH 6.0 for 10 min followed by cooling at RT for 20 min
