

# Material Safety Data Sheet (MSDS)

Last updated October 2020; Revision Number: 2.0

## **Product and Company Identification**

*Product Name:* Mouse anti SPA Monoclonal Antibody  
*Catalog Number:* 606-310  
*Unit Size:* 100 µg  
*Manufacturer/Supplier:* AbboMax, Inc.  
2528 Qume Dr. 8  
San Jose, CA 95131  
Tel: 408-573-1898      Emergency Phone: 408-799-2497  
Fax: 408-573-1858

## **Composition / Information on Ingredients**

The vial contains purified antibody supplied in a buffer consisting of 0.01M Phosphate-Buffered Saline (pH 7.2-7.4) with 0.01% NaN<sub>3</sub> and antibody stabilizer.  
No hazardous ingredient is present in an amount that requires labeling.

## **Hazards Identification**

No hazardous ingredient is present in an amount that requires labeling.  
The contents of ingredients listed as hazardous are given below:

| Component | Ingredient   | Concentration | CAS#       | EC#       | Classification<br>(Pure ingredient) | Classification<br>(antibody Preparation) |
|-----------|--------------|---------------|------------|-----------|-------------------------------------|--|
| Antibody  | Sodium Azide | 0.01% (W/V)   | 26628-22-8 | 247-852-1 | N/A                                 | N/A                                      |

**First aid Measures**

First aid personnel should ensure self protection.

- After swallowing:* Immediately make casualty drink plenty of water, induce vomiting for conscious patient and arrange a medical treatment.
- After skin contact:* Wash off with plenty of water. Remove contaminated clothing. If necessary arrange medical treatment.
- After eye contact:* Rinse out with plenty of water with the eyelids held wide open. Arrange medical treatment.

**Accidental Release Measures**

Use appropriate protective equipment and methods to clean up spilled substances promptly. Absorb spill onto an appropriate material. Collect and dispose of all waste in accordance with applicable laws.

**Handling and Storage**

General good laboratory practice should be maintained. Take care to keep workplace clean and dry. The substances used should not be present at the place of work in quantities above those required for carrying out the work. Do not leave containers open. Avoid general contact by handling, wear gloves and lab coat.

Store vials with the lids tightly closed at 4-8°C preferably in the dark.

**Exposure Controls / Personal Protection**

Wear appropriate gloves, protective clothing and eyewear and follow safe laboratory practices.

**Specific use**

The product is intended for *in vitro* research use only. Intended for professional use only.

**ACGIH/OSHA Permissible Exposure Limit Data:**

Not determined

**Physical and Chemical Properties**

- |                              |                          |
|------------------------------|--------------------------|
| <i>Appearance:</i>           | Clear solution, odorless |
| <i>pH:</i>                   | 7.2-7.4                  |
| <i>Boiling Point:</i>        | N/A                      |
| <i>Melting Point:</i>        | N/A                      |
| <i>Flash Point:</i>          | N/A                      |
| <i>Explosive properties:</i> | N/A                      |

### **Stability and Reactivity**

Stable. Store at 4-8°C and replace at this temperature at the end of the working procedure.

Avoid heating above room temperature, freezing, contaminating.

Generally use only clean glass and plastic suitable for laboratory use for handling the antibody preparation.

Note that individual ingredients are incompatible with acids, heavy metals, metallic salts, bromine, dimethylsulfate, copper, dichloromethane, carbondisulfide and peptidases.

### **Toxicological Information**

Because of the small size of the vial and the low concentration of hazardous ingredients, the toxicological risks are minor.

Toxicological experiments have not been done on the antibody preparation.

The following toxicological information is for the hazardous ingredient in pure form from ChemIdplus:

**Sodium Azide** is a cytochrome oxidase inhibitor which is a nitridizing agent and an inhibitor of terminal oxidation (Merck Index, 12th ed). Sodium azide acts as a fungicide, bactericide, herbicide, insecticide and nematocide.

### **Further ecological information**

Do not allow to enter waters, waste water or soil.

Due to the small size of the vial and the low concentrations of hazardous ingredients, ecological risks are minor.

### **Transport Information**

|                                  |                             |
|----------------------------------|-----------------------------|
| <i>Hazard Class:</i>             | N/A                         |
| <i>Identification Number:</i>    | N/A                         |
| <i>Packing Group:</i>            | N/A                         |
| <i>Proper Shipping Handling:</i> | Lower temperature (2°C-8°C) |

### **Regulations**

The product does not contain a hazardous ingredient in an amount that requires identification and labeling according to EC directives.

### **Other Information**

#### **For research use only.**

Read Product Specification before using the product. Observe the general safety regulations when handling chemicals. Good laboratory practice is the best preventive measure to avoid hazards.

The information above is believed to be accurate and represents the best information currently available to us. Users should make independent decision regarding completeness of the information based on all sources available. Abbomax, Inc shall not be held liable for any damage resulting from mishandling or from contact with the above product.
