

Rabbit anti Synuclein beta Polyclonal Antibody

Alternative Name(s): Synuclein beta; SNCB

Order Information

Description: Synuclein beta
Catalogue: 500-2774
Lot: See label
Size: 100ug/200ul
Host: Rabbit
Clone: nan
Application: IHC(P)

• Reactivity: Hu, Rt

ANTIGEN PREPARATION

A synthetic peptide corresponding to the C-terminus of Synuclein beta

BACKGROUND

beta-synuclein is a member of the synuclein family, which also includes alpha- and gamma-synuclein. Synucleins are abundantly expressed in the brain and alpha- and beta-synuclein inhibit phospholipase D2 selectively. SNCA may serve to integrate presynaptic signaling and membrane trafficking. Defects in SNCA have been implicated in the pathogenesis of Parkinson disease. SNCA peptides are a major component of amyloid plaques in the brains of patients with Alzheimer's disease.

PURIFICATION

The Rabbit IgG is purified by Epitope Affinity Purification

FORMULATION

This affinity purified antibody is supplied in sterile Phosphatebuffered saline (pH7.2) containing antibody stabilizer

SPECIFICITY

This antbody recognizes human and rat Synuclein beta. The other species not tested.

STORAGE

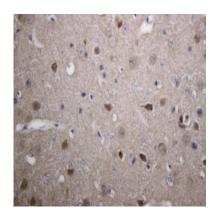

The antibodies are stable for 24 months from date of receipt when stored at –20oC to –70oC. The antibodies can be stored at 2oC-8oC for three month without detectable loss of activity. Avoid repeated freezing-thawing cycles.

APPLICATIONS/SUGGESTED WORKING DILUTIONS*

- Western Blot: 0.1-1 μg/ml
- ELISA: 0.01-0.1 μg/ml
- Immunoprecipitation: 2-5 µg/ml
- IHC: 2-10 µg/ml
- · Flow cytometry: Not tested
- Molecular Weight: 15.0
- Positive Control: Kidney Tissue
- Cellular Location: Cell Membrane

^{*}Optimal dilutions should be determined by researchers for the specific applications.

Immunohistochemistry: Human Brain (FFPE) stained with Rabbit anti-Synuclein-beta (Cat#500-2774) at 1:200 for 10 min @ RT. Staining of formalin-fixed tissue requires boiling tissue sections in 10 mM Citrate Buffer, pH 6.0 for 10 min followed by cooling at RT for 20 min
