Rabbit anti Mammaglobin Polyclonal Antibody
Alternative Name(s): mammaglobin A; SCGB2A2,

Order Information
- **Description:** Mammaglobin
- **Catalogue:** 602-500
- **Lot:** See label
- **Size:** 100µg/200ul
- **Host:** Rabbit
- **Clone:** nan
- **Application:** IHC(P)
- **Reactivity:** Hu

ANTIGEN PREPARATION
A synthetic peptide FL NQT DET LSN VE corresponding to the inter-sequence of human mammaglobin protein.

BACKGROUND
Mammaglobin and lopophilin B, formed a covalent complex, belong to the secretoglobin superfamily. Mammaglobin has been currently discovered as a promising diagnostic marker for breast cancer. The mammaglobin/lipophilin B complex determination may be used a novel protein-based serological marker for breast cancer.

PURIFICATION
The Rabbit IgG is purified by Epitope Affinity Purification

FORMULATION
This affinity purified antibody is supplied in sterile Phosphate buffered saline (pH7.2) containing antibody stabilizer

SPECIFICITY
This antibody only recognizes ~10 kDa of human mammaglobin. The other species are not tested.

STORAGE
The antibodies are stable for 24 months from date of receipt when stored at −20oC to −70oC. The antibodies can be stored at 2oC-8oC for three month without detectable loss of activity. Avoid repeated freezing-thawing cycles.

APPLICATIONS/SUGGESTED WORKING DILUTIONS*
- Western Blot: 0.1-1 µg/ml
- ELISA: 0.01-0.1 µg/ml
- Immunoprecipitation: 2-5 µg/ml
- IHC: 2-10 µg/ml
- Flow cytometry: Not tested
- Molecular Weight: 10.0
- Positive Control: Kidney Tissue
- Cellular Location: Cell Membrane

*Optimal dilutions should be determined by researchers for the specific applications.
Western Blot: The cell lysate derived from MCF-7 was immuno-blotted by Rabbit anti Mammoglobin antibody (Cat#602-500) at 1:500. Observed a major immunoreactive band at molecular weight ~15 kDa.

Immunohistochemistry: Human breast cancer tissue stained with Rabbit Anti-Mammoglobin antibody (Cat# 602-500) at 1:100 for 10 min @ RT. Staining of formalin-fixed tissue requires boiling tissue sections in 10 mM Citrate Buffer, pH 6.0 for 10 min followed by cooling at RT for 20 min.
