

Mouse anti CD45 (Leukocyte common antigen, LCA) Monoclonal Antibody

Alternative Name(s): CD45

Order Information

- **Description:** CD45 (Leukocyte common antigen, LCA)
- **Catalogue:** 603-131
- **Lot:** See label
- **Size:** 100ug/200ul
- **Host:** Mouse
- **Clone:** ABM496-LJ27.9
- **Application:** IHC(P), FACS
- **Reactivity:** Hu

ANTIGEN PREPARATION

Human peripheral lymphocytes were used as for an immunogen.

BACKGROUND

The leukocyte common antigen (LCA/CD45) consists of a family of heavily glycosylated glycoproteins of apparent MW 180- 240kD). It is a transmembrane protein-tyrosine-phosphatase. The LCA family includes a group of proteins present on all mature B and T lymphocytes, thymocytes, macrophages, spleen, lymph node, chronic lymphatic leukemia cells, bone marrow, thymus and granulocytes. It is absent in brain, kidney, liver, heart, erythrocytes, platelets and normal serum. The leukocyte common antigen is an abundant lymphocyte surface antigen that has been reported to be involved in signaling through the T cell antigen receptor. CD45 may function in the regulation of L-selectin (CD62L), in regulation of B-lymphocyte negative and positive selection and in T-cell activation. It stains lymphocytes, monocytes, eosinophils and also neoplastic cells of lymphoid origin. Neoplastic B cells and T cells in leukemia and in non-Hodgkin's lymphomas stain positive. This antibody may be useful in the evaluation of malignant lymphoma and nonlymphoid tumors. Neoplastic B and T cells in leukemia and in non-Hodgkin's lymphoma stain positive and hence can be distinguished from sarcomas and carcinomas.

PURIFICATION

The mouse IgG is purified by Protein A-Affinity Chromatography according to Isotyping

FORMULATION

This affinity purified antibody is supplied in sterile Phosphatebuffered saline (pH7.2) containing antibody stabilizer

SPECIFICITY

This antibody recognizes human CD45 protein. The other species are not tested.

STORAGE

The antibodies are stable for 24 months from date of receipt when stored at -20oC to -70oC. The antibodies can be stored at 2oC-8oC for three month without detectable loss of activity. Avoid repeated freezing-thawing cycles.

APPLICATIONS/SUGGESTED WORKING DILUTIONS*

- Western Blot: 0.1-1 µg/ml
- ELISA: 0.01-0.1 µg/ml
- Immunoprecipitation: 2-5 µg/ml
- IHC: 2-10 µg/ml
- Flow cytometry: 0.5-5 µg/106 cells
- Molecular Weight: 180-240
- Positive Control: Kidney Tissue
- Cellular Location: Cell Membrane

DATA ATTACHMENTS

Immunohistochemistry: Human Tonsil (FFPE) stained with Mouse anti-CD45 (Clone ABM496) (Cat# 603-131) at 1:200 for 10 min @ RT. Staining of formalin-fixed tissue requires boiling tissue sections in 10 mM Citrate Buffer, pH 6.0 for 10 min followed by cooling at RT for 20 min.
