

Mouse anti CD81 Monoclonal Antibody

Alternative Name(s): S5.7; CVID6; TAPA1; TSPAN28

Order Information

• Description: CD81(TAPA-1)

• Catalogue: 605-070 • Lot: See label

• Size: 100ug/200ul • Host: Mouse

• Clone: 5A6

• Application: IHC(P), FC

• Reactivity: Hu

ANTIGEN PREPARATION

A recombinant protein of human CD81

BACKGROUND

CD81 molecule is a member of the transmembrane 4 superfamily. It is also known as the tetraspanin family. Most of these members are cell-surface proteins that are characterized by the presence of four hydrophobic domains. The proteins mediate signal transduction events that play a role in the regulation of cell development, activation, growth and motility. CD81 is a cell surface glycoprotein that is known to complex with integrins. It promotes muscle cell fusion and support myotube maintenance. It is a candidate gene for malignancies.

PURIFICATION

The mouse IgG is purified by Protein A-Affinity Chromatography according to Isotyping

FORMULATION

This affinity purified antibody is supplied in sterile Phosphatebuffered saline (pH7.2) containing antibody stabilizer

SPECIFICITY

This antibody recognizes human CD81(TAPA-1) protein. The other species are not tested.

STORAGE

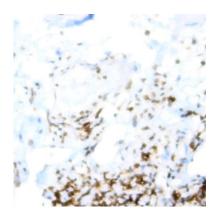

The antibodies are stable for 24 months from date of receipt when stored at –20oC to –70oC. The antibodies can be stored at 2oC-8oC for three month without detectable loss of activity. Avoid repeated freezing-thawing cycles.

APPLICATIONS/SUGGESTED WORKING DILUTIONS*

- Western Blot: 0.1-1 µg/ml
- ELISA: 0.01-0.1 μg/ml
- Immunoprecipitation: 2-5 µg/ml
- IHC: 2-10 µg/ml
- Flow cytometry: 0.5-5 µg/106 cells
- Molecular Weight: 43.0
- Positive Control: Kidney Tissue
- Cellular Location: Cell Membrane

^{*}Optimal dilutions should be determined by researchers for the specific applications.

Immunohistochemistry: Human breast carcinoma (FFPE) stained with Mouse anti- CD81 (Cat# 605-070) at 1:200 for 10 min @ RT. Staining of formalin-fixed tissue requires boiling tissue sections in 10 mM Citrate Buffer, pH 6.0 for 10 min followed by cooling at RT for 20 min
