

Ab^{Max} Peptide Carrier Protein Conjugation (Cat# 60004)

The peptide sequence information should be available for protein chemistry determination.

The data will be provided with the project:

- ❖ KLH/BSA/GGG/THY (a selected carrier protein) Conjugation datasheet
- ❖ Additional charge will be applied if specific conjugation efficiency is required, including the molar ratio of peptide/carrier protein, SDS-PAGE verification. Please e-mail us (info@abbomax.com) for further information.

Timetable

- ❖ Conjugation: 2-4 days.
